

LEUCO

MAGENTIFY WOOD PROCESSING

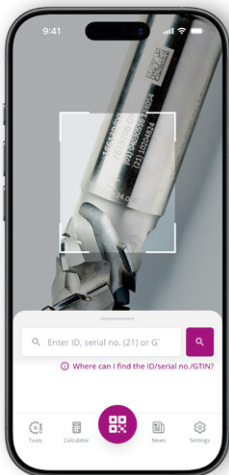

Your LEUCO tool data right at your finger tips

With the **LEUCO Tool Info App**

NEW: Calculate feed rate, rotations per minute, or number of teeth directly in the app

All the data about your LEUCO tools right on your smartphone.

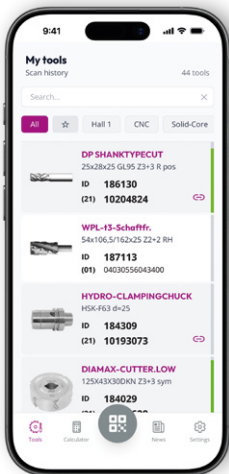

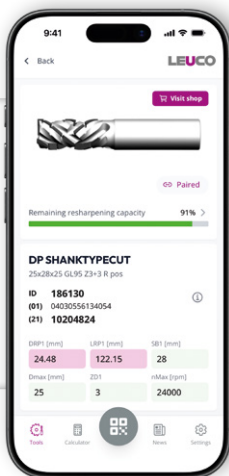

Scan your tool, data at your fingertips right away

Scan the code on the tool or enter the ID. Technical data, application information, and operating instructions are immediately available, right at your fingertips.

NEW: Homag, Brandt, IMA, and HolzHer part numbers also lead to a suitable LEUCO tool.

Everything about the tool, all in one place

Master and catalog data, application data, documents. Plus tool history, actual measurement data, maintenance performed, and remaining sharpening opportunities. No more searching through folders and lists.

Your Tools, Your Organization

Create your own lists by machine, facility, project, or favorites. The search finds the tool after just a few characters. From there, go directly to the LEUCO store or to your contact person.

What settings do I need to use to process this workpiece material with this tool?

The Tool Info App now answers this question!

NEW: Calculation Tool for Shank-Type Tools

Enter the tool and workpiece material, select the processing operation, done. The tool calculates the optimal mode of application. No looking up values, no converting, no estimating based on experience.

For feed rate, rotations per minute, or number of teeth. In millimeters or inches.

Your benefits

→ Everything at a Glance

Relevant information about your LEUCO tools all in one place, clearly organized, and available at any time—saves time and makes searching easier.
